

## EPRO InsulationTest Easy Tan Delta

### Versatile C and Tan Delta Tester

Measurements (Standard):      Capacitance and Tan Delta

Measurement Accuracy and Range:

Capacitance Range:              10 pF to 1,5 nF

Current measurement range: 0,35 uA to 890 uA

Voltage Measurement range: 0,6 to 630 (2.000) V

Voltage accuracy:                +/-0,025%

Current accuracy:                +/-0,0025

Capacitance:                      +/-0,1% of reading +/- 1 pF

Tan Delta:                         +/-0,1% of reading +/-  $5 \times 10^{-5}$

Power Factor:                    +/-0,1% of reading +/-  $5 \times 10^{-5}$

Vtage Source:                    630 VAC or 2.000 VAC version available

Frequency:                        10 to 1.000 Hz adjustable

Output:                            45 VA, other on request available

Safety:                             Port for external safety interlock and Safety and condition lamps
